

JOB DESCRIPTION

JUNIOR SMART HOME ENGINEER

About Equippd

At Equippd we design, install and support the very best technology for high-end residential homes. We're a young, dynamic team with a passion for quality and exciting, bespoke technology solutions. We work with homeowners, architects and interior designers to deliver some of the very best in home technology, from smart lighting to home cinema, and everything in between.

The Role

We are searching for an enthusiastic and hands-on young person to join our growing team and learn all about the booming smart home industry. You will be working within our Projects Team learning first hand from our experienced, friendly engineers, developing practical installation skills, programming knowledge and technical theory behind some of the most cutting-edge home technology solutions available today.

Office Address - 145b Walton Road, East Molesey KT8 0DU

Working around - Surrey, London and the South East

Times - Monday to Friday 7.30am - 4.30pm

Job Type - Full-time

Salary - TBC

In the short term

- You will learn everything about Equippd, how we do things differently and the ways we deliver our amazing projects
- You will be working with our Projects team on-site installing and commissioning different Equippd systems.
- You will be assisting in connecting, installing, testing and commissioning equipment
- You will be assisting with building racks off-site at our workshop
- You will be in charge of loading and unloading vans and keeping materials fully stocked
- When not on project-based installations, you will be assisting with service visits and carrying out healthchecks on our existing projects

After 6 months in the role

- You will start to know what you're doing, and be given more freedom and responsibility to carry out installation work on your own
- You will have the opportunity to attend company-funded training to specialise in key areas of residential technology installation, commissioning and programming.

In the longer term

- The opportunity of progression as an AV Engineer, with increased responsibility and specialisation in the areas you are most interested in.

Qualifications

You have these:

- Great organisational skills, keeping work areas, vehicles and workshop neat and tidy
- Great interpersonal skills, interacting with our team members and our customers (who are often high net worth individuals)
- Good with your hands, and not afraid to get stuck in and push yourself beyond what you know
- Respect for our client's homes and possessions as you will be working in some of the most expensive properties in England
- A hunger to learn and develop your skills in what is a new, exciting and dynamic industry

We would love it if you had these:

- Basic IP/LAN networking and WiFi knowledge
- Experience with hand tools and power tools
- Full UK driving licence

Working at Equippd:

Some of the perks for being part of Equippd:

- In house training by our experienced team (first six months)
- Opportunity to develop, grow and learn new skills via company funded training
- Use of a company vehicle / van (if applicable)
- Provision of a company card for expenses (after passing probation)
- Eligibility into the Equippd Partner Programme after 3 years (bonus / profit share)
- Private medical insurance inc. annual cash-back on dental / optical (after passing probation)

We want to find people who believe in our goals and feel inspired enough to grow while they're here to fill the role, rather than someone who checks the boxes but isn't invested. We encourage you to apply with your cover letter and CV and show us what you've got.
